

App-Routing.module.ts

- To easily move from one component to another.

```
import { NgModule } from '@angular/core';
import { Routes, RouterModule } from '@angular/router';

const routes: Routes = [
  {path: '',loadChildren:()=>import('./home/home.module').then(mod=>mod.HomeModule)},
  {path: 'employee',loadChildren:()=>import('./employee/employee.module').then(mod=>mod.EmployeeModule)},
  {path: 'customer',loadChildren:()=>import('./customer/customer.module').then(mod=>mod.CustomerModule)},
  {path: 'booking',loadChildren:()=>import('./booking/booking.module').then(mod=>mod.BookingModule)}
];

@NgModule({
  imports: [RouterModule.forRoot(routes)],
  exports: [RouterModule]
})
export class AppRoutingModule { }
```
